

Viewtron iOS (iPhone / iPad) & Android App via QR code Setup

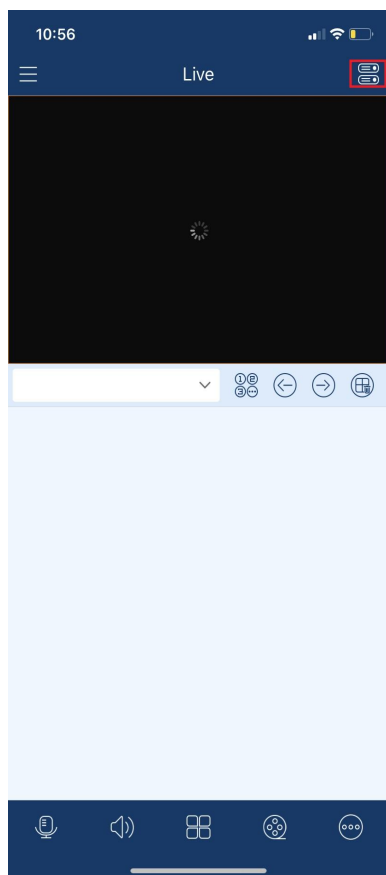

Our Viewtron NVR/DVRs support remote camera viewing using the SuperLive Plus app for mobile devices. The SuperLive Plus app will allow you to remotely view the live video (audio too), playback and control PTZ / zoom cameras.

1. Download the **SUPERLIVE PLUS** app in the iOS App / Google play store. Open the app on your mobile device once downloaded.

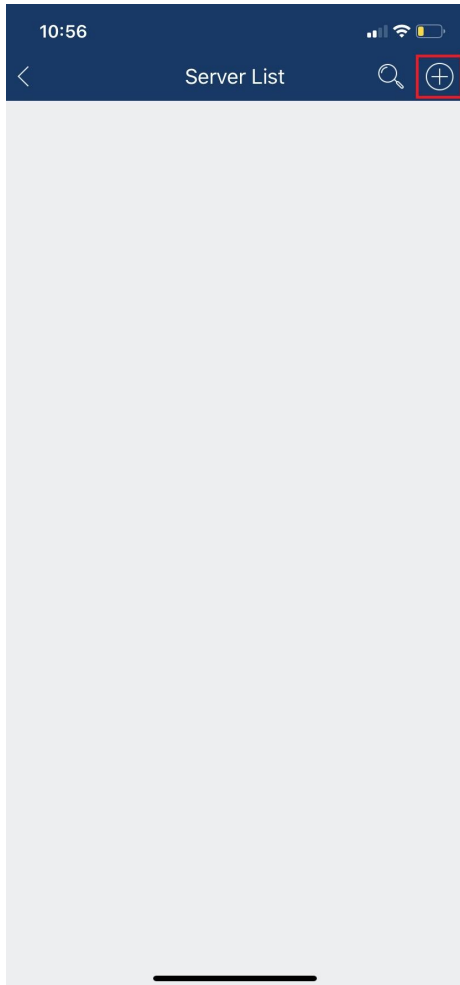

SuperLive Plus

2. Open the App > Select the **SERVER LIST** option located in the top right corner of the screen.

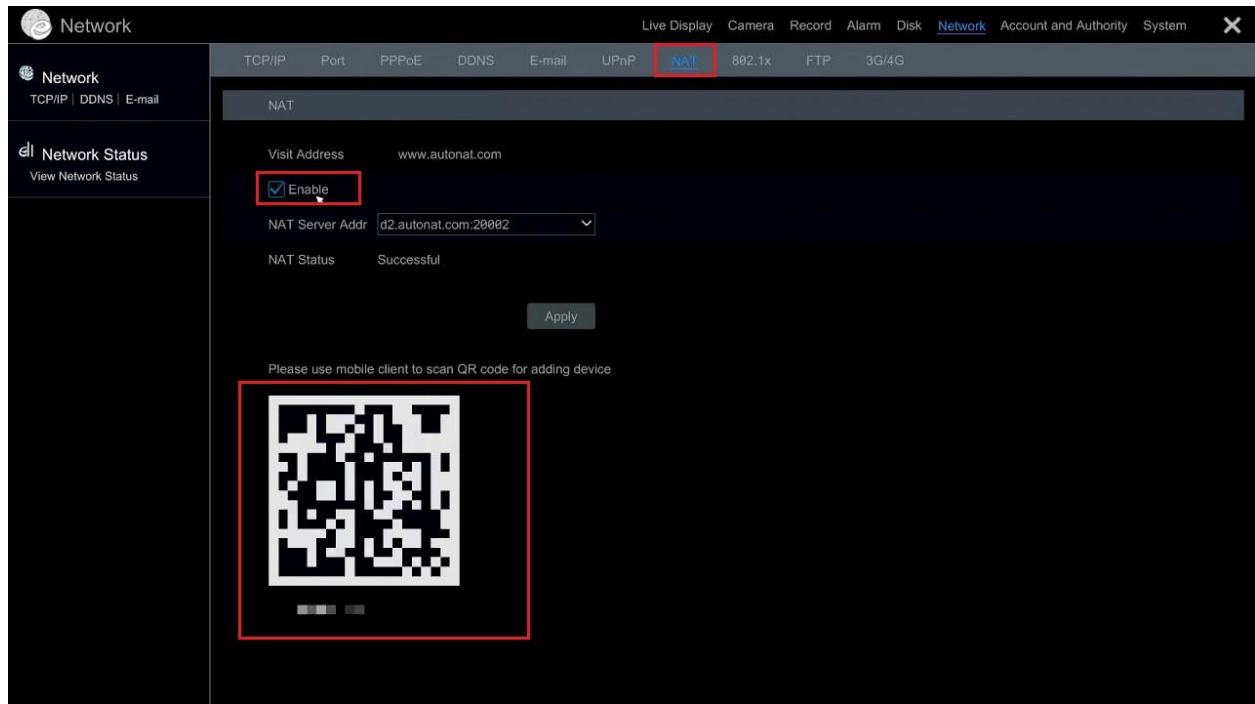

2. Now Click the + button located in the upper right corner to add your Viewtron DVR/NVR > Select the **SCAN CODE TO ADD** option. You should now see a QR scanner (proceed below to the next step)

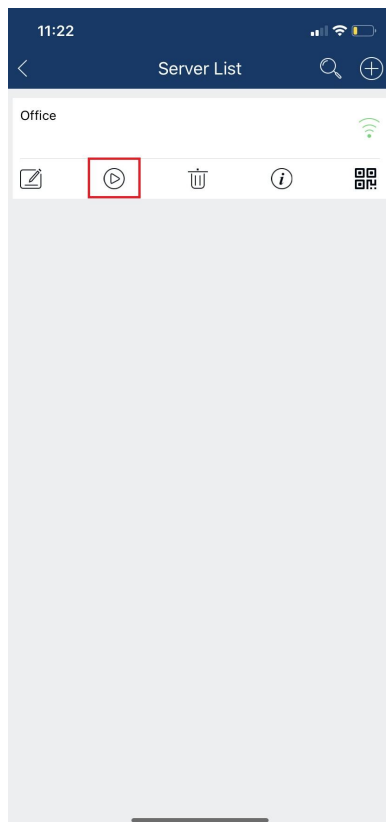

5. Now moving over to your DVR / NVR. Login and navigate to navigate to **SETTINGS** > **NETWORK** > **NAT**

6. Now make sure the **ENABLE** box is checked > Click **APPLY**.

7. Now simply scan the QR code with the SuperLive Plus app and it will prefill the DVR / NVR in > Click **SAVE**.

4. Now, once saved click the **PLAY** button to initiate the connection to the DVR.

You should now see the live video
